FOR IMMEDIATE RELEASE
July 19, 2016

AUSTIN-BASED START-UP LAUNCHES EZPROTECT, THE INDUSTRY'S FIRST AND ONLY ANTI-VIRUS SCANNER FOR SALESFORCE *With the Colorado Department of Transportation (CDOT) and other large financial institutions as First Adopters*

Austin, TX, 1BJuly 19, 2016– Adaptus is pleased to announce the successful release of EZProtect™, the first and ONLY anti-virus scanner available for Salesforce® , with early adopters [Colorado Department of Transportation](#) and other large financial institutions.

“We’re thrilled to announce the release of EZProtect, and are very happy to provide network security for forward-thinking financial institutions and CDOT”, said Alex Wong, Chief Technical Officer, Adaptus. “We look forward to providing government, financial, and other large institutions using Salesforce with the same opportunity to protect their networks,” he continued.

Designed for large enterprises by Salesforce-certified architects, EZProtect is the ONLY virus scanning application available for Salesforce users and easily scans chatter files, documents, attachments, and content for harmful viruses. Through careful and clean design, EZProtect makes the detection and deletion of viruses, malware, Trojan horses, and other malicious threats effortless and painless.

“It’s amazing to us that until now, there has not been a virus scanner available for Salesforce,” stated Qing Lin, Policy & Budget Analyst for CDOT. “The minute we learned about the application, we requested a demo and initiated it as quickly as possible,” she continued. “The team at Adaptus has been great, and we were up and running in no time. The application has worked seamlessly, and we are much more relieved to know customers who work with us in the Salesforce environment are protected against malware, phishing, and Trojan horse viruses often found in attachments.”

About Adaptus

Adaptus, LLC is an application development and Salesforce architecture consulting firm based in Austin, TX. Founded in 2012 on the premise of collaborating with customers to solve real problems, Adaptus products are used by large, Fortune 500 companies with thousands of users.
